## DUCTILE IRON

The AVONA Ductile Iron Blade is the most cost effective solution to cutting ductile iron pipe versus a traditional abrasive blade.

## FEATURES & BENEFITS

### Unique Segment

Engineered 5mm segment which provides lightning fast cutting on Ductile Iron Pipe.

### Electroplated Side Coating

The blade has a special silica based side protective coating used to deburr the pipe while cutting.

### Cost Effective Solution

This blade will outlast 60-80 traditional abrasive blades while never shrinking, delivering a consistent depth of cut. It will cut 3x as fast and save time changing abrasive blades on the saw.

### Applications

Available in 14" & 16" primarily used for Ductile Iron Pipe.
